Claim Filing Information for Enrolled Family Members of the Camp Lejeune Family Member Program (CLFMP)

Covered conditions
The Department of Veterans Affairs (VA) Camp Lejeune Family Member Program provides reimbursement for costs related to hospital care and medical services for one or more of the following 15 covered conditions:

- Bladder cancer
- Breast cancer
- Esophageal cancer
- Female infertility
- Hepatic steatosis
- Kidney cancer
- Leukemia
- Lung Cancer
- Miscarriage
- Multiple myeloma
- Myelodysplastic syndromes
- Neurobehavioral effects
- Non-Hodgkin's lymphoma
- Renal toxicity
- Scleroderma

Also covered are associated medical conditions that are caused or exacerbated by the conditions listed in the law. (Example: hip fracture secondary to spread of breast cancer into the bones.)

VA is the last payer of claims for covered conditions and will provide reimbursement after all other forms of insurance have been used. If you have no other health insurance, VA will be the primary payer of bills for these covered conditions. Under CLFMP, VA does not have the authority to reimburse treatment costs for illnesses or injuries not associated with these 15 medical conditions.

Prescription coverage/pharmacy benefits
The CLFMP designed a formulary that shows potential drugs related to the treatment of the 15 Camp Lejeune conditions. If your prescription is not listed on the formulary, it may take additional time to verify the prescription is a treatment for one of the covered conditions. You can review the formulary on the CLFMP website at https://www.clfamilymembers.fsc.va.gov.
